

ROUTEMASTER

NETWORK CLARITY BUSINESS EFFICIENCY

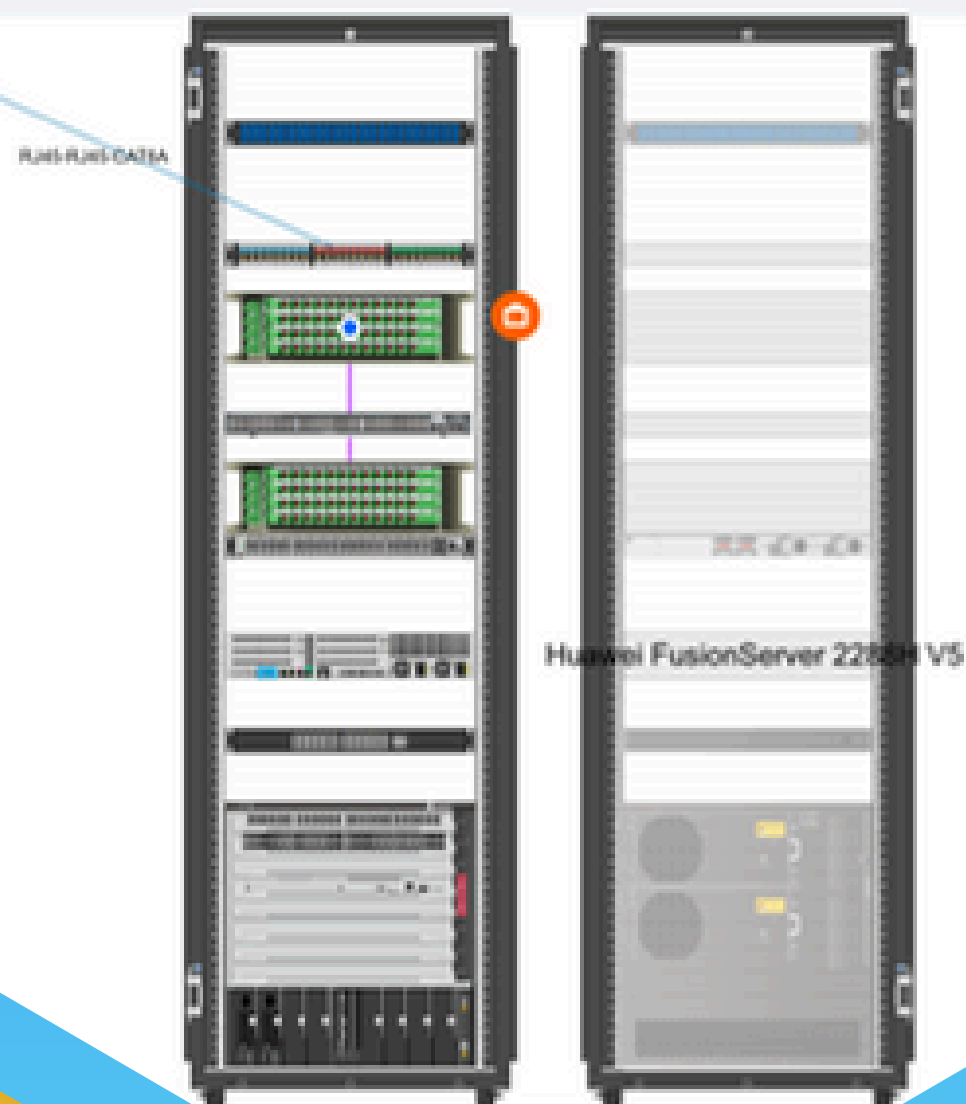

**WE HELP YOU DOCUMENT YOUR NETWORK
THROUGH OUR CLOUD-BASED
COLLABORATIVE ENVIRONMENT**

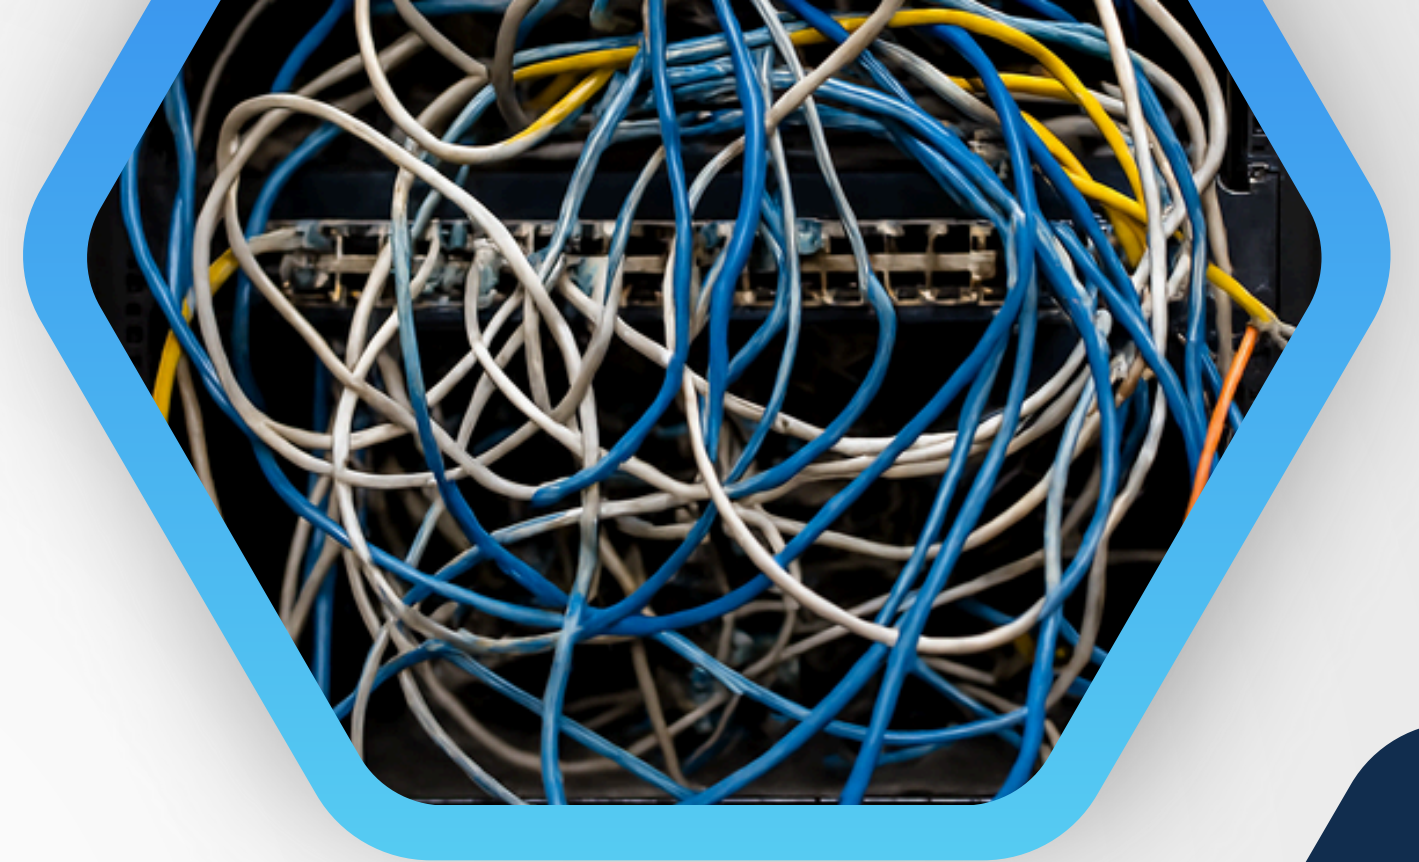

Service Overview

We specialize in professional network documentation services, leveraging our proprietary in-house developed cloud solution, ROUTEMASTER OSP. Our collaborative approach ensures that we partner directly with our clients to deliver precise and comprehensive documentation for **computer rooms, structured cabling, and fiber optic outside plant (OSP).**

The High Cost of Poor Documentation

1. Inefficient troubleshooting and extended downtime.
2. The challenge of onboarding new team members without a clear network map.
3. Lost institutional knowledge when key employees leave.
4. Difficulty planning for future growth and upgrades.

Our Solution

Professional Documentation in a Cloud-Based Collaborative Environment

Professional Documentation

We deliver accurate, structured, and audit-ready network documentation tailored for companies and data centers.

Our services cover device mapping, cabling sheets, rack layouts, and equipment reports—ensuring clarity, consistency, and compliance across your infrastructure records.

Cloud-Based Collaboration

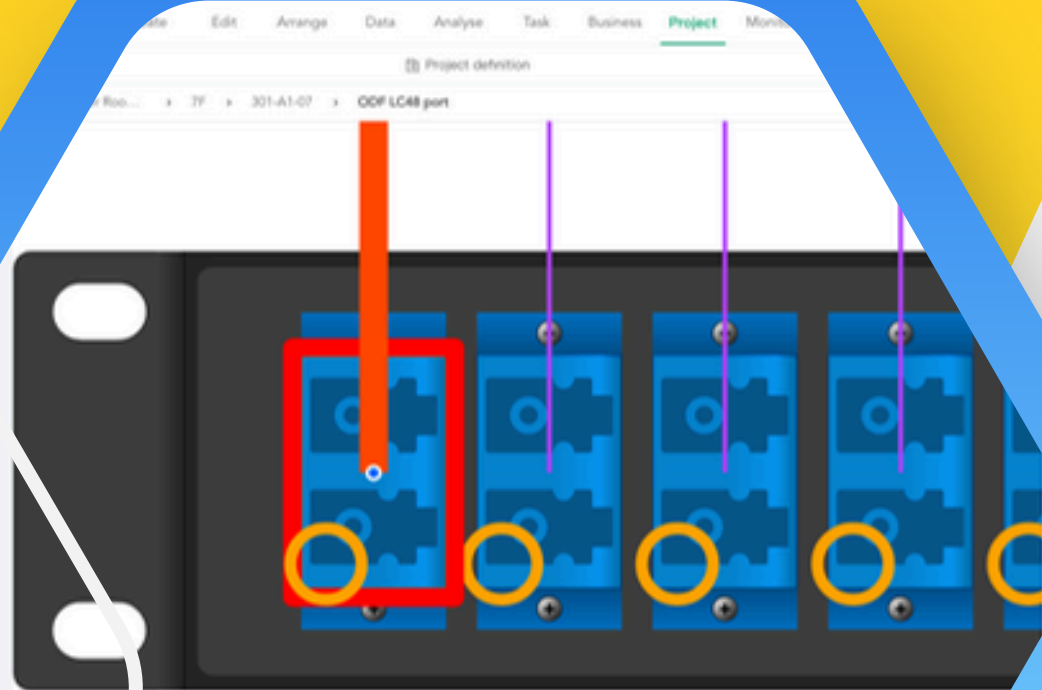

We provide a secure cloud workspace where your team can collaborate in real time. This enables seamless reviewing, editing, and updating of documentation—reducing communication gaps, avoiding version conflicts, and ensuring everyone works from the same source of truth.

Powered by ROUTEMASTER OSP

Our process is built on ROUTEMASTER OSP, a specialized platform for network documentation. It streamlines planning, tracking, and reporting while offering automated tools for labeling, incident analysis, and long-term documentation maintenance.

Why Our Clients Trust Us?

Reduce Network Downtime

Clear documentation speeds up troubleshooting and keeps your business running.

Streamline Operations

A shared cloud workspace eliminates confusion and improves efficiency.

Enable Secure Growth

Scalable documentation supports expansion while maintaining security.

Ensure Compliance

Audit-ready records simplify reviews and reduce compliance risks.

Case Studies

Our Success Stories

International Airport (2024)

We centralized the airport's device and cabling records in the cloud, helping engineers reduce downtime, locate faults faster, and stay compliant with aviation standards.

National Bank (2020)

We standardized branch network documentation in a cloud workspace, improving security visibility, streamlining operations, and simplifying audits.

ISP (2022)

We mapped and updated the ISP's expanding fiber network in ROUTEMASTER OSP, enabling real-time collaboration, quicker incident resolution, and scalable growth.

Our Contact Information

Have questions or want to see how we can improve your network documentation? Our team is here to help. Reach out today to discuss your needs.
